# Regenerate frying oil instead of discarding it

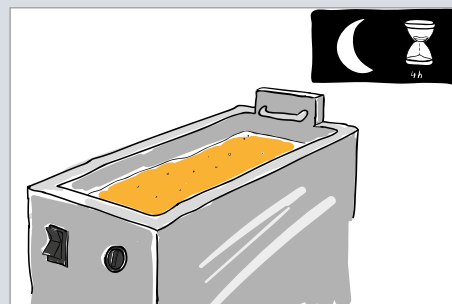

With the new Magnesol® Pad you remove the fat spoiling agents in an all-natural way, now easier than ever. By doing so, you can save up to 50% of your oil cost with minimal effort.

Regeneration is this simple:

1 Put 1 pad per 10 liters content into the hot frying oil and switch off the fryer.

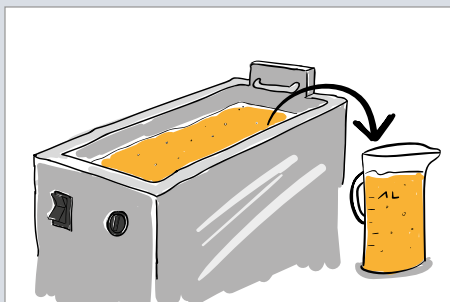

2 Let the pad soak overnight but at least for 4 hours.

3 Remove the pad with tongs, let it drain and dispose of it as normal waste.

4 Remove 1 liter of frying oil per pad and use it for cooking on the stove or in the oven.

5 Replenish the fryer with fresh oil to normal level and you are done and ready.
